

Two 8ft Twist kits w/Lambda Bright, 1 Flexi Connector panel & 2 single cases w/graphic

Two Twist Kits and one additional Flexi Connector panel combine to form a corner display.

Four Twist Kits and Three Flexi Connector panels fill up a 10' x 20' display space.

The most flexible, modular portable exhibition system. An exhibition stand that is different! Twist offers incredible flexibility, stability and ease of use. The Twist has been designed to fulfill a wide range of exhibiting solutions, from 10' spaces to endless backwalls.

The Twist gives you the ultimate in flexibility and value for your money. No tools necessary for kit assembly

Create backdrops and exhibition displays that are unique. Center connection panel bends to create convex to concave displays.

- Small single hard shipping case

# Twist®

Extremely stable and simple to erect, the Original Twist banner is the basis for the Twist range. Complete with an integrated low voltage light and transformer, the Twist also has the ability to be single or double sided as standard, i.e. graphics on the front and back.

With just one set of hardware, the Original Twist can take any width graphic panel between 27.6" - 39.4" and linking with our Easi link kit seamlessly joins stands and graphics together. Moreover, our patented tensioning system makes Twist self levelling, allowing banners to link together on uneven and difficult floors.

AN EASI-LINK KIT  
(3 magnetic bars allow you to connect Twist stands together)
